

Data Product Name

Customer Orders Gold Dataset

Description

This data product provides cleaned and structured customer order data built using the Medallion Architecture. It enables analytics, reporting, and business insights.

Problem it solves

- Eliminates raw data inconsistencies
- Provides ready-to-use analytics dataset
- Ensures data quality and reliability

Data Sources

- Raw orders dataset
- Customer dataset

Schema

- order_id (string)
- customer_id (string)
- order_date (timestamp)
- price (float)
- updated_at (timestamp)

Access

- SQL table (Gold layer)
- Python / Spark access

Refresh Frequency

Daily

Quality Metrics

- Completeness > 98%
- Uniqueness = 100%
- Freshness < 24h
- Validity (price > 0) > 99%

Known Limitations

- Possible delays in ingestion
- No automatic historical backfills

Example Usage

```
SELECT customer_id, SUM(price)
FROM gold_table
GROUP BY customer_id;
```
